Education

Web Design & Development Bachelor of Science
Full Sail University
August 2012 - June 2014 | Winter Park, FL

The WDDBS program has a very strong focus on Web Development. Information architecture and usability, and user interfaces are key components of the design aspects of the program. It's an intense, accelerated program generally consisting of 48 hours on campus per week spread between two classes, with about 20 hours of homework, per class. We eat, drink, and sleep code.
